Recent Top Secret/SCI Clearance

Debra Jordan is a distinguished senior government executive with a focus on cybersecurity, public safety, national security, and business resilience through reliable and secure information and communications technology. She has excelled in executive leadership, policy strategy, technology modernization, and complex stakeholder engagement. Debra has implemented key policies like establishing the U.S. Cyber Trust Mark for IoT products. Her commitment to operational readiness and strategic innovation continues to drive impactful changes in cybersecurity and public safety, including achieving consensus among multi-sector regulators for a common baseline cybersecurity framework. She is passionate about mission readiness and data-driven performance management. She excels in harmonizing complex strategic partnerships and has a history of reinventing the status quo. She brings strong regulatory experience with a focus on resilience, cybersecurity, and accountability through novel frameworks.
